## IMPROVING ATM SECURITY WITH GPS TRACKERS

***Digital Matters versatile range of ATM GPS tracking devices allow Financial Institutions to add a layer of protection for the ATMs by deterring theft, facilitating swift recovery, aiding in criminal identification, optimizing operations and satisfying insurance and risk management requirements.***

Digital Matter's ATM GPS trackers are *battery-powered* and are ultra-rugged in their design with IP68-rated housing, allowing them to perform at the highest level in the most extreme conditions.

ATM trackers are engineered with a '*deploy-once*' long battery life lasting up to 10+ years using off-the-shelf user-replaceable Lithium, Lithium Thionyl Chloride (LTC), or Alkaline batteries. Discrete and easy to conceal, ATM trackers can be easily installed for a comprehensive ATM security solution.

All ATM GPS devices are designed for *flexible configuration*, enabling Financial Institutions to monitor important data accurately. Settings can be managed remotely for multiple devices to easily set configurations in bulk when provisioning.

### **Benefits of ATM GPS for Security:**

***Theft Prevention:*** ATM security systems act as a deterrent for potential thieves.

***Rapid Recovery:*** ATM trackers can be switched into a recovery mode that enables the authorities to quickly locate and recover the stolen machine.

***Preventative Maintenance:*** ATM GPS devices allow financial institutions to monitor the status and usage of their ATMs efficiently.

***Insurance and Risk Management:*** ATM security systems may be required by insurance providers as a risk management measure.

## **Create Your ATM Security Solution Today**

***ATM GPS trackers provide a comprehensive and reliable solution to enhance your ATM security. Get access to the technology and support to help you track what matters most to your business.***
